WORK EXPERIENCE

EY Global Delivery Services India LLP, Haryana, India   July 2019 - July 2022
Advanced Analyst

- Assisted in growth and expansion of Capital Edge and was assigned to 3 client projects within the United States region, working on technologies like Angular, SQL Server, C#, Azure
- Led migration of 3 client projects from an outdated SharePoint platform to a new Azure platform, participating in every stage from design to implementation to post-deployment
- Managed projects for a period of 6 months due to a shortage of resources and was subsequently given expanded duties, ranging from Angular development to overseeing projects and even taking on tasks in NodeJS and C#
- Supervised a team of 5 individuals, comprising both new hires and those involved in reporting and quality assurance, due to extensive knowledge and experience with the project
- Created SQL Triggers for more than 10 tables, impacting both primary and foreign tables, and improved APIs written in C# (.Net) to enhance overall performance and customize product to meet specific client requirements

EY Global Delivery Services India LLP, Haryana, India   January 2019 - July 2019
Analyst Trainee / Consultant

- Designed a comprehensive website using Angular JS and SharePoint for EY teams located in Germany to demonstrate various offerings and strategies of EY and support sales pitch for different services to clients
- Created a collaboration website alongside a senior developer acting as a platform for sharing ideas, designs, business scenarios, workflows, etc. which can be utilized to enhance EY's business or optimize existing workflows
- Completed configuration tasks for client projects situated in 2 distinct regions

ACADEMIC PROJECTS

Northeastern University, Boston, MA   November 2022 - December 2022
WiFi-Signal-Strength-Mapping, Object Oriented Design, Semester 1 Project (Java 8, C++)

- Developed a software along with 3 team members that aims to determine optimal location for a Wi-Fi router within a floor plan
- Built 4 screens of application in JavaFX and implemented navigation between screens, file upload/save functionality, multi-threading, and creation of a Java jar file
- Migrated C++ code written in MAC environment to Windows using MinGW-64 bit GCC compiler
- Completed the project in around 2 months and earned an A+ for the project
